Instant64-Serie

Why do I have unresolved package dependencies in SuSE and Plesk?

status/error:

The messages on YaST give out that there are unresolved package dependencies for exampe "psa-tomcat-configurator", "php5-ioncube-loader", "sitebuilder-core-php5" or "apache2-mod_php5".

problem-solving:

Nothing.

background:

This is only cosmetic. The installed packages for Plesk are not included in the Repository of SuSE. Because of that this message appears.
