Allgemein

How large can an email be so that it can be sent without any problems?

You can find out the maximum email size for sending or receiving emails via an

email account at EUserv in the respective product description of your plan on the

EUserv homepage.

For example, if you ordered the plan “MailDomain Pro” the maximum size of emails

is 100 MB.

From this size, you should split the attachments of your emails.

Suitable tools for splitting your file attachments can be found for free on the Internet.

However, emails should generally not be sent at such sizes because

a) the delivery lasts very long and
b) the recipient can have problems while receiving the email.

For larger data transfers protocols such as FTP/SSH/SCP or the EUserv online BackupHD

are recommended.
