

Einrichtung FTP-Upload

How can I upload my files on the EUserv webspace with FileZilla ??

In order to establish an FTP connection with your EUserv webspace you will need an FTP client. As such FileZilla is most applicable for this.

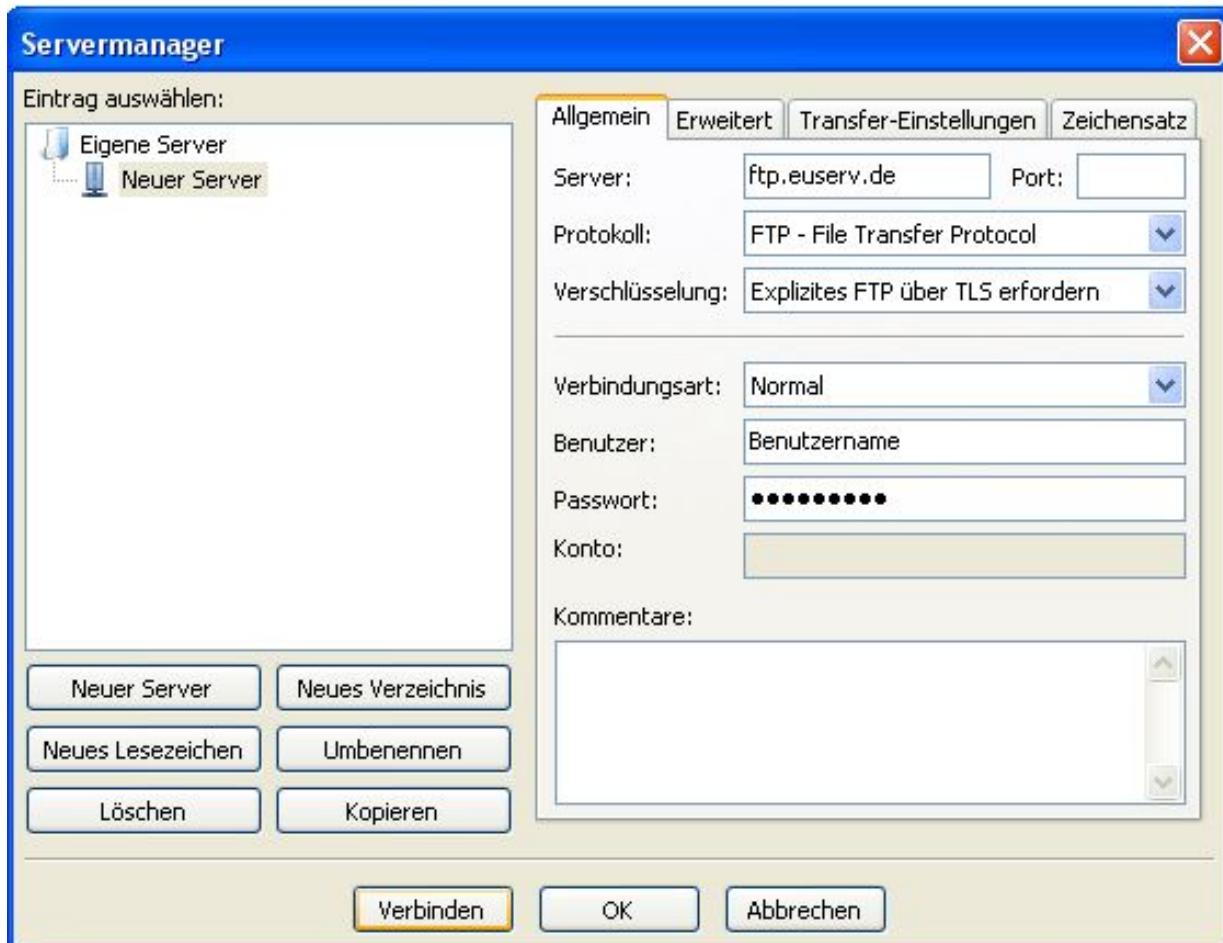

It also provides secure (TLS/SSL) connections.

Open FileZilla and click on the "File" tab where you will find the "Site Manager".

On the bottom left you will now see the options to create, delete, copy, rename etc. a server.

Einrichtung FTP-Upload

Click the button "New Site" here.

Now a new server is being created which you can assign a name to.

Now enter the name of your EUserv server address under the "General" tab: ftp.euserv.de

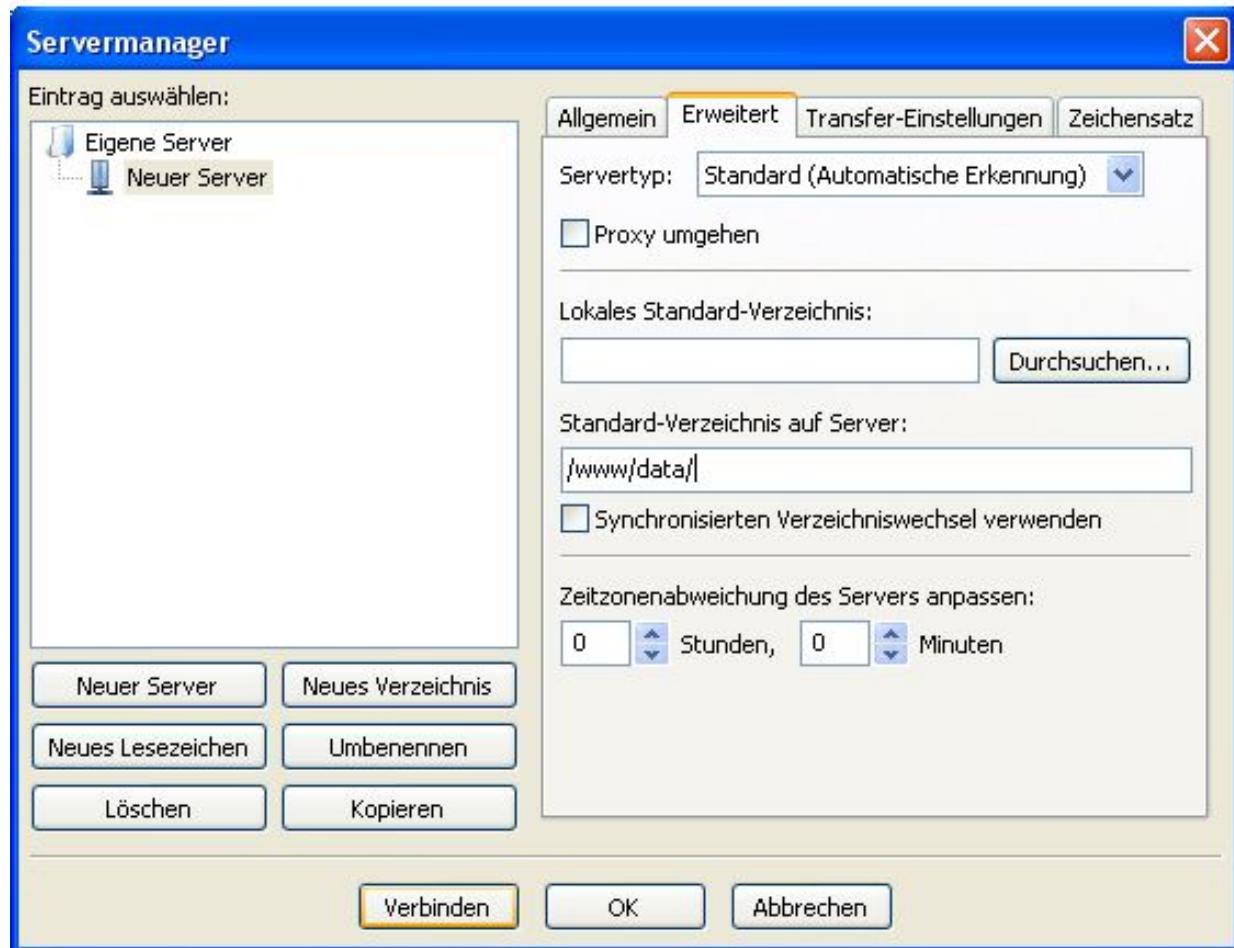

Under "Servertype" select *FTPS* (*FTP over explicit TLS/SSL*).

Choose the option "Normal" under "Logontype".

Enter your username and password here.

Click on the "Advanced" tab and enter */www/data/* under the option "Default remote directory".

Einrichtung FTP-Upload

Finally click on "Connect".

An SSL certificate will be displayed to you which you will have to confirm by clicking "OK".

Now you are granted access on your web space, being able to upload your files on the server.

After being connected successfully you can see two browser windows below. The left one shows the directory structure of your local disk and the right one the directory structure of the server.

Einrichtung FTP-Upload

The screenshot shows the FileZilla interface with two panes. The left pane, 'Lokal:', shows the local file structure on drive C:\, including 'Arbeitsplatz', 'C:', and 'D:'. The right pane, 'Server:', shows the server structure at /www/data, with 'www' containing 'index.html' and 'data'. Below the panes is a file list table with columns: Dateiname, Dateigröße, Dateityp, and Zuletzt geändert. The local list shows 9 Dateien und 8 Verzeichnisse with a total size of 2,145,690,935 Bytes. The server list shows 1 Datei with a size of 0 Bytes. At the bottom, a progress bar indicates the transfer of 'index.html' from the local drive to the server. A status bar at the bottom shows 'Zu übertragende Dateien', 'Fehlgeschlagene Übertragungen', and 'Erfolgreiche Übertragungen (1)'.

Dateiname	Dateigröße	Dateityp	Zuletzt geändert
...			
Dokumente und E...		Dateiordner	27.01.2012 12:38:34
install		Dateiordner	03.04.2012 11:35:48
Programme		Dateiordner	08.05.2012 10:09:02
RECYCLER		Dateiordner	27.01.2012 12:41:57
System Volume I...		Dateiordner	27.09.2011 14:53:55

9 Dateien und 8 Verzeichnisse. Gesamtgröße: 2.145.690.935 Bytes

Server/Lokale Datei	Richtung	Datei auf Server	Größe	Priorität	Status
index.html	...		0	Firefox Doc...	30.05.2012 09:...

1 Datei. Gesamtgröße: 0 Bytes

Zu übertragende Dateien | Fehlgeschlagene Übertragungen | Erfolgreiche Übertragungen (1)

To upload a locally stored file on your EUserv web space just use the drag&drop function and drag the file from the left to the right browser window.

During the file transfer you are shown the file type, in which direction they are transferred, how many successful/corrupt transfers have been made and how many files are still pending.

Einrichtung FTP-Upload

Establishing a connection with your web space via the "Quickconnect" bar

Einrichtung FTP-Upload

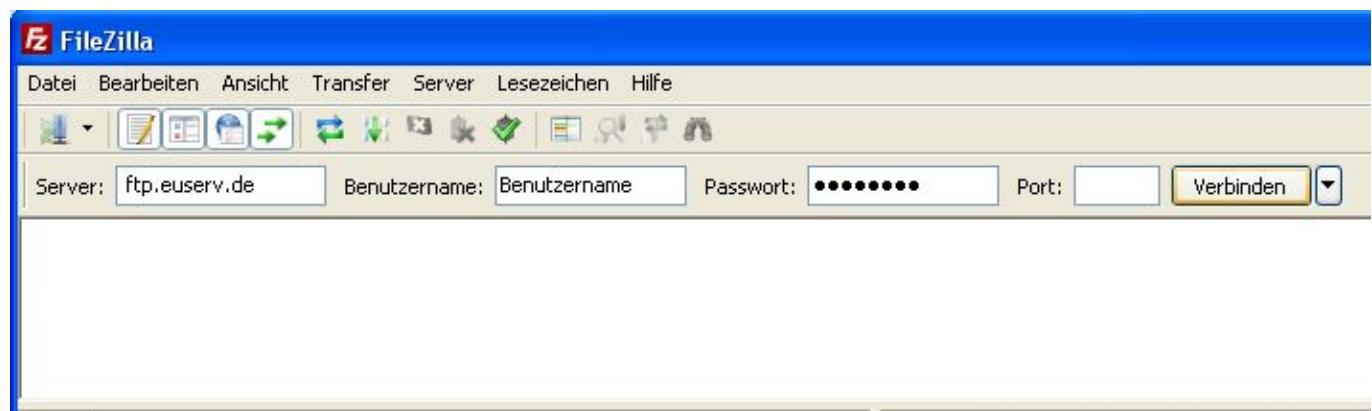

It's also possible to establish an FTP connection in FileZilla with the "Quickconnect" bar.

Einrichtung FTP-Upload

To this enter the following data into the upper task bar: 'Server:' `ftp.euserv.de` ein, 'Username': your username and under

'Password:' your password.

Einrichtung FTP-Upload

Einrichtung FTP-Upload

Now click on "Quickconnect" and FileZilla will connect with your web space.

Einrichtung FTP-Upload

In case you have set up your connection via the Site Manager you can select your server from the arrow button next to the

Quickconnect button.
