Domain

Which differences are between domain plans and maildomain plans?

The plans "Domain Basic" and "DomainPro" are pure domain plans without mailboxes (mail accounts). We also offer plans that feature storage for your mails ("MailDomain Lite" and "MailDomain Pro").

Please note the performance descriptions on our website:

Domain plans include:

- email addresses

- email redirects

- wildcard email

MailDomain plans include:

- email addresses

- email redirects

- wildcard email

- email mailboxes with corresponding storage on our mail servers

You can always upgrade your existing domain plan to a MailDomain plan via the customer center, allowing you to configure mailboxes in the relevant size and number under your domain.

Having set up a mailbox, you can redirect and/or connect your mail addresses with a mailbox. Furthermore it's also possible to enable spam and virus protection for your account. Additionally you can also use the webmail interface to fetch your mail online.
