BackupHD

How can I access my BackupHD by using a WebDAV app?

With so-called WebDAV apps you can easily manage your BackupHD via your smartphone or tablet.

The user data for your BackupHD can be found in our customer center.

1. Log in to the customer center.
2. Select your contract.
3. Select "Verwaltung" in the Menu Point "FTP-Backup".

In the following overview you can administrate your FTP backup account plans with which you can back up your data from your server or externally.

Please note:
Especially in managing your BackupHD via WebDAV, it is necessary to put “https://" before specifying the WebDAV server during the login, the destination address in this case will be 'https://webdav1.kundencontroller.de'.
