FTP-Accounts

How can I establish an FTP connection with my web browser ?

Under Windows 2000/XP you can establish an FTP connection with the Internet Explorer Internet Explorer / Mozilla Firefox for instance.

To establish an FTP connection with your web browser just type a URL with the following form in the browsers address field, e.g.:

ftp://FTP-username:FTP-password@ftp-server.tld/

For example:

ftp://ftp13131313-44551:yourpassword@yourftpserver.xom/

Important notice:

You can find your FTP user and the corresponding password in the customer center under "FTP-Accounts". The responsible FTP server name can be found at your FTP accounts.
